

Adventus 18650 Battery Charger User Manual

When the AC-DC Adapter is plugged into the AC outlet, Green light is lit.

When the Charge Base is connected to the AC-DC Adapter, the Red light on the Charge Base is lit. The Red light on the Charge Base is lit even without connecting to the AC-DC Adapter if you put a 18650 battery in.

When you put the battery into the Charge Base which is connected to the AC-DC Adapter, the Red light is shown on the AC-DC Adapter if the battery is charging. Battery must be inserted properly for good electrical contact, such as + / - charging direction. The light on the AC-DC Adapter will change from Red to Green when the battery is fully charged.
